

Richard Westmoreland

rawestmoreland@gmail.com | <https://richardwestmoreland.com> | github.com/rawestmoreland

Experienced Fullstack Engineer with 5+ years building high-performance web applications and mobile solutions across SaaS platforms. Expertise in React, React Native, NextJS, TypeScript, and modern development practices, including automated testing, accessibility compliance, and team leadership through technical migrations and mentorship.

Skills

Programming Languages: Typescript, JavaScript, HTML, CSS/Sass, Python, Go, Dart, PHP, GraphQL, PostgreSQL

Frameworks & Libraries: React, NextJS, Node.js, Express, React Native, Flutter, Redux, TailwindCSS, Jest, Vitest, Storybook, Strapi, Sanity, Contentful, Webflow, Cypress E2E Testing

Tools & Platforms: Anthropic APIs, OpenAI APIs, Claude Code, Git, GitHub Actions, Firebase, Supabase, Vercel, Docker, Netlify, Digital Ocean, Stripe, Linear, JIRA, LemonSqueezy, Launch Darkly, PostHog

Experience

Freelancer / Personal Sabbatical | June 2024 - Present | Remote

- Took an intentional professional pause to pursue international travel and engage in entrepreneurship.
- Created and launched Waitlisty - a SaaS for building custom waitlist forms.
- Created Lobstr Social - a React Native app for connecting racket sports players in Lisbon, Portugal.

Software Engineering Lead | Going | June 2022 - June 2024 | Remote

- Launched our first React Native mobile app, which reached 500k downloads in 3 months
- Led web team through multiple revenue-increasing experiments and feature implementations as lead software engineer
- Spearheaded complete application rebrand while simultaneously migrating legacy codebase to NextJS framework
- Delivered the Going for Teams B2B dashboard, introducing TailwindCSS to accelerate development and shipping velocity

Software Engineer | DroneDeploy | January 2022 - June 2022 | Remote

- Architected and implemented deep linking functionality for a hybrid Cordova application built with TypeScript and Angular
- Researched and developed cross-platform deep linking strategies for iOS and Android mobile applications
- Mentored team members on deep linking implementation and best practices

Software Engineer | FlightAware | February 2020 - December 2021 | Remote

- Built product purchase wizard and account management interfaces for FlightAware Aviator - using React, implementing the company's first Redux integration
- Established an automated testing culture by introducing Jest and React Testing Library across web applications
- Led FlightAware Web Accessibility Initiative, drafting WCAG 2.1 compliance roadmap, and implementing accessibility improvements site-wide
- Trained development colleagues on accessibility requirements and established sustainable best practices

Airline Captain | SkyWest Airlines | December 2014 - January 2020 | Houston, TX

- Operated CRJ aircraft within company standard operating procedures to ensure passenger safety and on-time performance.

Projects

Waitlisty | waitlisty.io

- SaaS platform for creating custom waitlist forms with 2-line code embedding and 5-minute setup

Keg Track App | kegtrackapp.com

- Mobile inventory management application built with React Native, Supabase, and Postgres

Education

Bachelor of Arts | University of Houston | 2005 - 2010 Music Education with All-Level Certification
